AI PLAYTIME · FREE PROMPT

Let AI find your *first* agent.

You don't have to know what to build. **Your work history already knows.**

COPY + PASTE THIS PROMPT

Act as my AI Agent Strategist.

Review my past 60–90 days of work, including emails, meetings, documents, tasks, chats, and recurring requests.

Look for patterns such as:

- → Repetitive tasks
- → Recurring research
- → Repeated decisions
- → Tasks that require information from multiple places
- → Frequent follow-ups
- → Similar meeting prep
- → Work that gets delayed or forgotten

Then recommend the **5 most useful AI agents** I should build based on my actual behavior.

HOW TO USE IT

01

Connect your work. Use an AI that can see your email, calendar, and files — like Microsoft Copilot, ChatGPT, or Claude with connectors on.

02

Paste the prompt. Run it as-is. Let it look across your real work, not your guesses about it.

03

Build one. Pick the agent that saves the most time this week. Start there.
